

You can achieve if you believe!

June 2015

HIV Prevention Workshop

During the month of June we had a speaker from **Positive Impact** come to our clubhouse to talk to us about HIV/AIDS. Taryn explained to our DR3AMR'S about prevention and treatment. She engaged them in various activities so they could fully understand the dangers of HIV and how to protect themselves from it. We were very pleased to have her since it's very important to us that our teens have a good knowledge on the topic

Positive Impact is a community-based organization that supports HIV care in the metro Atlanta area including mental health and substance abuse treatment. They also offer HIV and STD prevention services.

Looking towards the future!

On June 10 our DR3AMR'S visited Oglethorpe University located in Atlanta. Our tour guide, Shiraz, an upperclassman gave us a fantastic tour of the University. As we walked, we felt like we were in a Harry Potter movie! Its amazing gothic style buildings were so appealing and made the tour very interesting. We learned the wide range of academic majors they offer, admission requirements, housing, sports, and even scholarships! It was a great way to show our DR3AMR'S what's next after high school. EDUCATION ROCKS!

F.Y.I: Prescription Drugs

On June 25 we had Diana Plazas from Prevention Department in our clubhouse and gave an interesting talk to parents about the prescribed medications. She touched basics on how to take the correct prescribed dose, and not share drugs with anyone, to keep them in a safe place and how to dispose old medications among other helpful tips. Parents were very receptive and shared their concerns with Diana about prescribed drugs.

~Elba Ramos.

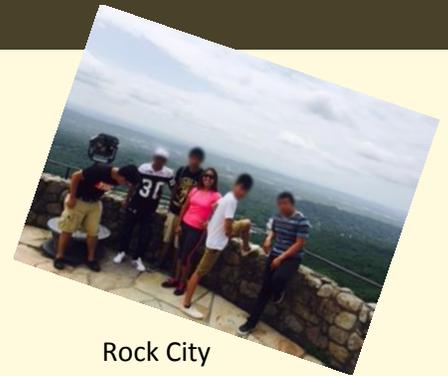

What have we been up to this month?...

Six Flags

Braves Game

Rock City
Tennessee

Stone Mountain
Aquatic Center

Zoo Atlanta

Kickball at Piedmont Park
